Project Brief:

You have the opportunity to create a new website for the Angry Angler. Please provide static HTML and CSS using the enclosed Photoshop file in accordance with the following requirements and specifications.

Requirements:

1. Slice the "angry-angler.psd" into functional html page
2. Create both the Home Page and an Interior Page
3. Include JavaScript Rotator / Slider:
    a. Four slides (Included in the Photoshop file)
    b. Behavior is up to the programmer's discretion (transitions / animations / etc)
    c. Fully functional, auto-cycling

Browser Support:

1. Internet Explorer: 10+
2. Last 3 versions of Firefox, Chrome, Safari

Notes:

1. Please refer to the Layer Comps Palette for final home page layout, interior page layout, and rollover states layout.
2. The programmer is at liberty to use any scripts/libraries/plug-ins or stylesheets.
3. Any text that is a non-websafe font should be made into an image unless other suitable options are available.

Delivery:

1. In the GitHub repo you accessed the project from, create a new branch titled: tyler-ziegelman
2. Commit and push your work to the 'tyler-ziegelman' branch

Questions?

You should have everything that you need to get building, but if something isn't clear do not hesitate to ask: mgoodenough@gmail.com
